Dear Sir/Madame,

SEC "Biomass" is looking for an opportunity for financing the project of wood pellets production on the basis of an existing Ukrainian enterprise. The project implies installation of production line with production capacity of 2 tons of wood pellets per hour. An annual production of pellets is expected to be around 11 tons. Western Europe is supposed to be the key market for such production. Meanwhile, as a result of production development, the procurement of such product might also happen on the national market. The relevance of the project is defined by constant demand for pellets worldwide, and especially in Western Europe, as well as by the high price of the given product on the international market.

Total financial cost of the project realization – 4.5 mill UAH.

Pay-back period (discounted) – about 3 years.

We will consider any proposals (credit arrangements, investments, share holding).
